

BRIDGE PLUG-CEMENT RETAINER 2DBP-CR

DESIGNED FOR

- Cement squeeze jobs of different purposes in cased hole wells;
- Well abandonment, suspension;
- As a based for whipstock in side-track operations;
- Any operations required usage of cement retainer;

FEATURIES

- Setting mechanism – by hydraulic setting tool by excessive pressure in tubing;
- Pressure differential up to 35MPa;
- Cementation is done right after setting of the plug without additional run for cementation;
- Both ways check valves installed in the retainer to avoid cement leak off; Also can be used as just plug without cementation;
- Composite material of the plug allows fast drilling of the plug;

SPECIFICATIONS

Cement retainer	Casing OD, mm	Casing wall thickness, mm	OD, mm	Length, mm	Weight, kg
2BP-CR-112-35	140	8.5-11	112	800	19
2BP-CR-118-35	140/146	6-8/6.5-11	118	800	22
2BP-CR-140-35	168/178	8-11/12.7-15	140	840	30
