

CIRCULATION VALVE KC

DESIGNED FOR

- As a part of packer or AL completion for equalising of the pressure below and above packer for easy release;
- Well killing procedure;
- Any other procedure where passing fluid from A annulus to the tubing required;

FEATURIES

- Hydraulically actuated by applying excessive pressure in annulus;
- Multiple open-close cycles in one run;
- Made of corrosion resistant materials;

SPECIFICATIONS

Description	KC-M2-114-52-35	KC-M2-136-76-35
Minimum casing Id, mm	120	142
Valve ID, mm	52	76
Temperature rating, C	100 (150)	100 (150)
Maximum pressure differential, MPa	35	35
Valve actuation pressure:		
First opening, MPa	5-6	5-6
Next openings, MPa	0.5-0.6	0.5-0.6
Valve OD, mm	114	136
Length, mm	700	760
Weight, kg	15	20
