

EQUALISING VALVE KU

DESIGNED FOR

- As a part of packer completion for equalising of the pressure below and above packer for easy release;

FEATURIES

- Opens by applying of pulling force;
- Opening force can be set to desire value;
- Rotation can be transmitted through valve;
- Made of corrosion resistant materials;

SPECIFICATIONS

Description	KU-M1-112-60-50
Temperature rating, C	100 (150)
OD, mm	112
Length, mm	470
ID, mm	60
Minimum casing ID, mm	121
Pressure differential, MPa	50
Valve opening pulling force, ton	2-6
Weight, kg	12
