

EQUALISING VALVE KUM

DESIGNED FOR

- As a part of packer completion for equalising of the pressure below and above packer for easy release;

FEATURIES

- Opens by applying of pulling force;
- Closes by setting force;
- Opening force can be set to desire value;
- Rotation can be transmitted through valve;
- Multiple open-close cycles in one run;
- Made of corrosion resistant materials;

SPECIFICATIONS

Valve	Casing ID, mm	Temperature rating, C	Working pressure, MPa	Valve Id, mm	Valve Od, mm	Length, mm	Weight, kg
