

PACKER PHS-M AGAINST TD OR LOWER PACKER SET TYPE

DESIGNED FOR

- Set of the packer against TD or lower packer by downward axial force;
- Used as a part of selective treatment (straddled) packer systems;
- Multi-set equipment with adjustable setting force;
- Any other operations required cased hole packer application;

FEATURIES

- Setting mechanism – axial movement of packer applied on TD or lover packer;
- Release mechanism — mechanical, axial pulling force on packer;
- Multiple set-release ability in one run of the packer with adjustable setting force;
- Pressure differential – 35MPa;
- Simple and the same time durable mechanisms of the packer makes it reliable and 100% stuck-free equipment;

SPECIFICATIONS

Packer	Casing OD, mm	Casing wall thickness, mm	Packer ID, mm	Length, mm	Weight kg
